Subject Index of Volume 169

Aluminium
  effect of ball-to-powder weight ratio on the amorphization reaction of $Al_{50}Ta_{50}$ by ball milling, 235
  rare earth separation using chemical vapor transport with $LnCl_3$–$AlCl_3$ gas phase complexes, L1
  new ternary calcium- and ytterbium–silver aluminides with silver–aluminium Kagomé nets in different stackings, 55
Ammonium lanthanide
  ammonium lanthanide double sulphate dihydrates, 283
Amorphization
  effect to ball-to-powder weight ratio on the amorphization reaction of $Al_{50}Ta_{50}$ by ball milling, 235
  hydrogen-induced amorphization of the Laves compound $CeNi_2$ and the structural and thermal characteristics of the amorphous phase, 245

Barium
  non-stoichiometry in lanthanide substituted $Ba_2Fe_2O_{5+\delta}$, 25
  crystal structure of Eu_2BaZnO_5 and the optical and magnetic properties of some related oxides, 217
  X-ray diffraction study of the orthorhombic–tetragonal transition in $Y_{1-x}Ca_xBaCu_3O_z$ superconductors as a function of the oxygen partial pressure at 500 and 600 °C, 115
Bismuth
  liquid state electrochemical study of bismuth–tellurium liquid alloys, 197
Bonding
  bonding properties and vibrational entropy of transition metal $MeB_2(AlB_2)$ diborides, 257

Cadmium
  calculation of horizontal sections of high-pressure phase diagrams of the Cd–Sn–Zn ternary system, 303
Calcium
  calorimetric studies of the liquid Ca–Cu–Mg alloys, 363
  deoxidation equilibrium of solid titanium, zirconium and niobium with calcium, 209
  new ternary calcium- and ytterbium–silver aluminides with silver–aluminium Kagomé nets in different stackings, 55
Calorimetric studies
  calorimetric studies of the liquid Ca–Cu–Mg alloys, 363
Carbon
  crystal and magnetic structure of the permanent magnet material $Tb_2Fe_{14}C$, 147
  nuclear magnetic resonance study and Curie temperature of $Y_2Co_{17}C_x$, L5
Cerium
  hydrogen-induced amorphization of the Laves compound $CeNi_2$ and the structural and thermal characteristics of the amorphous phase, 245
  study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
  thermal conductivity Nd–Ce–Cu–O superconductors, L17
Chemical vapor transport
  rare earth separation using chemical vapor transport with $LnCl_3$–$AlCl_3$ gas phase complexes, L1
Chlorination
  study of the chlorination of copper(I) and copper(II) oxides, 181
Chlorine
  rare earth separation using chemical vapor transport with $LnCl_3$–$AlCl_2$ gas phase complexes, L1
Chromium
  crystallographic data, magnetic and vibrational properties of the series $Ln(OH)CrO_4$ (Ln ≡ La, Pr, Nd), 105
  on phase formation in thin layers of the system Cr–Si–O, 331
  oxidation resistant Mo–W–Cr–Pd alloys with palladium coatings, 19
Clathrate structure
  new ternary intermetallic compounds with the clathrate structure: $Ba_8(T,Si)_6Si_{40}$

and $Ba_6(T,Ge)_{40}$ where T ≡ Ni, Pd, Pt, Cu, Ag, Au, 291
Cobalt
magnetic phase diagram of the $DyFe_{10-x}Co_xV_2$ system, L11
magnetic properties of UCo_2P_2 with $CaBe_2Ge_2$ type structure and $LnNi_2P_2$ (Ln ≡ Gd–Tb) with $ThCr_2Si_2$ type structure, 139
nuclear magnetic resonance study and Curie temperature of $Y_2Co_{17}C_x$, L5
Complex diffusion
case of complex diffusion: transport of oxygen atoms in hydrated silica glass, 125
Copper
note on the Li–Cu–O system, 33
study of the chlorination of copper(I) and copper(II) oxides, 181
calorimetric studies of the liquid Ca–Cu–Mg alloys, 363
thermal conductivity of Nd–Ce–Cu–O superconductors, L17
X-ray diffraction study of the orthorhombic–tetragonal transition in $Y_{1-x}Ca_xBaCu_3O_z$ superconductors as a function of the oxygen partial pressure at 500 and 600 °C, 115
Crystal structure
crystal and magnetic structure of the permanent magnet material $Tb_2Fe_{14}C$, 147
Crystallographic data
crystallographic data, magnetic and vibrational properties of the series $Ln(OH)CrO_4$ (Ln ≡ La, Pr, Nd), 105
Crystallographic studies
crystallographic studies of some pseudobinary intermetallic systems of rare earths, 187
Curie temperature
nuclear magnetic resonance study and Curie temperature of $Y_2Co_{17}C_x$, L5

Deoxidation
deoxidation equilibrium of solid titanium, zirconium and niobium with calcium, 209
Deuterium
investigation of diffusion and migration of hydrogen, deuterium and tritium in palladium in a Hall field, 227
Diborides
bonding properties and vibrational entropy of transition metal $MeB_2(AlB_2)$ diborides, 257
Diffusion
investigation of diffusion and migration of hydrogen, deuterium and tritium in palladium in a Hall field, 227
mechanical-strain-induced influences on hydrogen diffusion within $Pd_{77}Ag_{23}$ alloy membranes, 157
Double sulphates
ammonium lanthanide double sulphate dihydrates, 283
Dysprosium
magnetic phase diagram of the $DyFe_{10-x}Co_xV_2$ system, L11

Electrochemistry
liquid state electrochemical study of bismuth–tellurium liquid alloys, 197
Enthalpies of formation
enthalpies of formation of some Ga–Y intermetallic compounds, L23
standard enthalpies of formation of Me_5Ge_3 (Me ≡ Sc, Y, La) by high-temperature calorimetry, 85
standard molar enthalpies of formation of Me_5Ge_3 (M ≡ Zr, Nb, Mo), MeGe (Me ≡ Ru, Rh, Pd) and Pd_2Ge by high-temperature calorimetry, 93
Europium
crystal structure of Eu_2BaZnO_5 and the optical and magnetic properties of some related oxides, 217

Gallium
enthalpies of formation of some Ga–Y intermetallic compounds, L23
Germanides
standard enthalpies of formation of Me_5Ge_3 (Me ≡ Sc, Y, La) by high-temperature calorimetry, 85
standard molar enthalpies of formation of Me_5Ge_3 (M ≡ Zr, Nb, Mo), MeGe (Me ≡ Ru, Rh, Pd) and Pd_2Ge by high-temperature calorimetry, 93
Glass
case of complex diffusion: transport of oxygen atoms in hydrated silica glass, 125

Heating rate
study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
High-temperature calorimetry
standard enthalpies of formation of Me_5Ge_3

(Me ≡ Sc, Y, La) by high-temperature calorimetry, 85
standard molar enthalpies of formation of Me_5Ge_3 (M ≡ Zr, Nb, Mo), MeGe (Me ≡ Ru, Rh, Pd) and Pd_2Ge by high-temperature calorimetry, 93
Horizontal sections
calculation of horizontal sections of high-pressure phase diagrams of the Cd–Sn–Zn ternary system, 303
Hydrides
magnesium–nickel alloy hydride compacts prepared by cylindrical explosion shock compression, 9
Hydrogen
investigation of diffusion and migration of hydrogen, deuterium and tritium in palladium in a Hall field, 227
mechanical-strain-induced influences on hydrogen diffusion within $Pd_{77}Ag_{23}$ alloy membranes, 157
on the existence of linear PtH_2^{2-} and planar PtH_4^{2-} anions in mixed crystals of the system Na_2PdH_2–Na_2PtH_4, 173
Hydrolysis
hydrolysis of lanthanide carbides: rates of reaction with water vapour, 349

Intermetallic compounds
new ternary intermetallic compounds with the clathrate structure: $Ba_8(T,Si)_6Si_{40}$ and $Ba_6(T,Ge)_{40}$ where T ≡ Ni, Pd, Pt, Cu, Ag, Au, 291
Iron
crystal and magnetic structure of the permanent magnet material $Tb_2Fe_{14}C$, 147
magnetic phase diagram of the $DyFe_{10-x}Co_xV_2$ system, L11
non-stoichiometry in lanthanide substituted $Ba_2Fe_2O_{5+\delta}$, 25

Kagomé nets
new ternary calcium- and ytterbium–silver aluminides with silver–aluminium Kagomé nets in different stackings, 55

Lanthanide dicarbides
hydrolysis of lanthanide dicarbides: rates of reaction with water vapour, 349
Lanthanides
crystallographic data, magnetic and vibrational properties of the series $Ln(OH)CrO_4$ (Ln ≡ La, Pr, Nd), 105
rare earth separation using chemical vapor transport with $LnCl_3$–$AlCl_3$ gas phase complexes, L1
magnetic properties of UCo_2P_2 with $CaBe_2Ge_2$ type structure and $LnNi_2P_2$ (Ln ≡ Gd–Tb) with $ThCr_2Si_2$ type structure, 139
non-stoichiometry in lanthanide substituted $Ba_2Fe_2O_{5+\delta}$, 25
Lanthanum
redetermination of the La–Ni phase diagram from LaNi to $LaNi_5$ (50–83.3 at.% Ni), 45
Linear anions
on the existence of linear PtH_2^{2-} and planar PtH_4^{2-} anions in mixed crystals of the system Na_2PdH_2–Na_2PtH_4, 173
Lithium
note on the Li–Cu–O system, 33

Magnesium
magnesium–nickel alloy hydride compacts prepared by cylindrical explosion shock compression, 9
Magnetic phase diagram
magnetic phase diagram of the $DyFe_{10-x}Co_xV_2$ system, L11
Magnetic properties
crystallographic data, magnetic and vibrational properties of the series $Ln(OH)CrO_4$ (Ln ≡ La, Pr, Nd), 105
crystal structure of Eu_2BaZnO_5 and the optical and magnetic properties of some related oxides, 217
magnetic properties of UCo_2P_2 with $CaBe_2Ge_2$ type structure and $LnNi_2P_2$ (Ln ≡ Gd–Tb) with $ThCr_2Si_2$ type structure, 139
Magnetic structure
crystal and magnetic structure of the permanent magnet material $Tb_2Fe_{14}C$, 147
Manganese
calorimetric studies of the liquid Ca–Cu–Mg alloys, 363
structural analysis of a novel carbon stabilized Mg–Pd alloy: Mg_2PdC_x, 371
study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
Membranes
mechanical-strain-induced influences on hydrogen diffusion within $Pd_{77}Ag_{23}$ alloy membranes, 157

Migration
investigation of diffusion and migration of hydrogen, deuterium and tritium in palladium in a Hall field, 227
Mixed crystals
on the existence of linear PtH_2^{2-} and planar PtH_4^{2-} anions in mixed crystals of the system Na_2PdH_2–Na_2PtH_4, 173
Molybdenum
oxidation resistant Mo–W–Cr–Pd alloys with palladium coatings, 19

$[N(CH_3)_4]_2BkCl_6$
syntheses and X-ray diffraction studies of $[N(CH_3)_4]_2BkCl_6$ and $[N(CH_3)_4]_2ZrCl_6$; absorption spectrum of Bk^{4+} in $[N(CH_3)_4]_2BkCl_6$, 1
$[N(CH_3)_4]_2ZrCl_6$
syntheses and X-ray diffraction studies of $[N(CH_3)_4]_2BkCl_6$ and $[N(CH_3)_4]_2ZrCl_6$; absorption spectrum of Bk^{4+} in $[N(CH_3)_4]_2BkCl_6$, 1
Neodymium
thermal conductivity of Nd–Ce–Cu–O superconductors, L17
Nickel
hydrogen-induced amorphization of the Laves compound $CeNi_2$ and the structural and thermal characteristics of the amorphous phase, 245
redetermination of the La–Ni phase diagram from LaNi to $LaNi_5$ (50–83.3 at.% Ni), 45
magnesium–nickel alloy hydride compacts prepared by cylindrical explosion shock compression, 9
magnetic properties of UCo_2P_2 with $CaBe_2Ge_2$ type structure and $LnNi_2P_2$ (Ln ≡ Gd–Tb) with $ThCr_2Si_2$ type structure, 139
Niobium
deoxidation equilibrium of solid titanium, zirconium and niobium with calcium, 209
Niturations
chemical reaction high-temperature X-ray diffraction: application to carbothermic niturations of zirconia, 317
Non-stoichiometry
non-stoichiometry in lanthanide substituted $Ba_2Fe_2O_{5+\delta}$, 25
Nuclear magnetic resonance
nuclear magnetic resonance study and Curie temperature of $Y_2Co_{17}C_x$, L5

Optical properties
crystal structure of Eu_2BaZnO_5 and the optical and magnetic properties of some related oxides, 217
Oxygen
case of complex diffusion: transport of oxygen atoms in hydrated silica glass, 125
note on the Li–Cu–O system, 33
non-stoichiometry in lanthanide substituted $Ba_2Fe_2O_{5+\delta}$, 25
on phase formation in thin layers of the system Cr–Si–O, 331
study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
study of the chlorination of copper(I) and copper(II) oxides, 181
thermal conductivity of Nd–Ce–Cu–O superconductors, L17
X-ray diffraction study of the orthorhombic–tetragonal transition in $Y_{1-x}Ca_xBaCu_3O_z$ superconductors as a function of the oxygen partial pressure at 500 and 600 °C, 115

Palladium
investigation of diffusion and migration of hydrogen, deuterium and tritium in palladium in a Hall field, 227
mechanical-strain-induced influences on hydrogen diffusion within $Pd_{77}Ag_{23}$ alloy membranes, 157
oxidation resistant Mo–W–Cr–Pd alloys with palladium coatings, 19
structural analysis of a novel carbon stabilized Mg–Pd alloy: Mg_2PdC_x, 371
palladium–platinum phase diagram, 167
Partial pressure
study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
X-ray diffraction study of the orthorhombic–tetragonal transition in $Y_{1-x}Ca_xBaCu_3O_z$ superconductors as a function of the oxygen partial pressure at 500 and 600 °C, 115
Permanent magnet
crystal and magnetic structure of the permanent magnet material $Tb_2Fe_{14}C$, 147
Phase diagram
calculation of horizontal sections of high-pressure phase diagrams of the Cd–Sn–Zn ternary system, 303

redetermination of the La–Ni phase diagram from LaNi to $LaNi_5$ (50–83.3 at.% Ni), 45
palladium–platinum phase diagram, 167
Phase formation
on phase formation in thin layers of the system Cr–Si–O, 331
Phosphorus
magnetic properties of UCo_2P_2 with $CaBe_2Ge_2$ type structure and $LnNi_2P_2$ (Ln ≡ Gd–Tb) with $ThCr_2Si_2$ type structure, 139
Planar anions
on the existence of linear PtH_2^{2-} and planar PtH_4^{2-} anions in mixed crystals of the system Na_2PdH_2–Na_2PtH_4, 173
Platinum
on the existence of linear PtH_2^{2-} and planar PtH_4^{2-} anions in mixed crystals of the system Na_2PdH_2–Na_2PtH_4, 173
palladium–platinum phase diagram, 167

Rare earths
crystallographic studies of some pseudobinary intermetallic systems of rare earths, 187
Rates of reaction
hydrolysis of lanthanide dicarbides: rates of reaction with water vapour, 349

Separation
rare earth separation using chemical vapor transport with $LnCl_3$–$AlCl_3$ gas phase complexes, L1
Silica
case of complex diffusion: transport of oxygen atoms in hydrated silica glass, 125
Silicon
on phase formation in thin layers of the system Cr–Si–O, 331
Silver
mechanical-strain-induced influences on hydrogen diffusion within $Pd_{77}Ag_{23}$ alloy membranes, 157
new ternary calcium- and ytterbium-silver aluminides with silver–aluminium Kagomé nets in different stackings, 55
Sintering
study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
Sodium
on the existence of linear PtH_2^{2-} and planar PtH_4^{2-} anions in mixed crystals of the system Na_2PdH_2–Na_2PtH_4, 173
Strain
mechanical-strain-induced influences on hydrogen diffusion within $Pd_{77}Ag_{23}$ alloy membranes, 157
Structure
new ternary intermetallic compounds with the clathrate structure: $Ba_8(T,Si)_6Si_{40}$ and $Ba_6(T,Ge)_{40}$ where T ≡ Ni, Pd, Pt, Cu, Ag, Au, 291
structural analysis of a novel carbon stabilized Mg–Pd alloy: Mg_2PdC_x, 371
crystal structure of Eu_2BaZnO_5 and the optical and magnetic properties of some related oxides, 217
Structure
hydrogen-induced amorphization of the Laves compound $CeNi_2$ and the structural and thermal characteristics of the amorphous phase, 245
Superconductors
thermal conductivity of Nd–Ce–Cu–O superconductors, L17

Tantalum
effect of ball-to-powder weight ratio on the amorphization reaction of $Al_{50}Ta_{50}$ by ball milling, 235
Tellurium
liquid state electrochemical study of bismuth–tellurium liquid alloys, 197
Terbium
crystal and magnetic structure of the permanent magnet material $Tb_2Fe_{14}C$, 147
Thermal conductivity
thermal conductivity of Nd–Ce–Cu–O superconductors, L17
Tin
calculation of horizontal sections of high-pressure phase diagrams of the Cd–Sn–Zn ternary system, 303
Titanium
deoxidation equilibrium of solid titanium, zirconium and niobium with calcium, 209
study of sintering parameters. Influence of the heating rate and the oxygen partial pressure on the oxides of manganese, cerium and titanium, 73
Transition metals
bonding properties and vibrational entropy of transition metal $MeB_2(AlB_2)$ diborides, 257
Transitions
X-ray diffraction study of the orthorhombic–tetragonal transition in $Y_{1-x}Ca_xBaCu_3O_z$

superconductors as a function of the oxygen partial pressure at 500 and 600 °C, 115
Tritium
investigation of diffusion and migration of hydrogen, deuterium and tritium in palladium in a Hall field, 227
Tungsten
oxidation resistant Mo–W–Cr–Pd alloys with palladium coatings, 19

Uranium
magnetic properties of UCo_2P_2 with $CaBe_2Ge_2$ type structure and $LnNi_2P_2$ (Ln ≡ Gd–Tb) with $ThCr_2Si_2$ type structure, 139

Vanadium
magnetic phase diagram of the $DyFe_{10-x}Co_xV_2$ system, L5
Vibrational entropy
bonding properties and vibrational entropy of transition metal $MeB_2(AlB_2)$ diborides, 257
Vibrational properties
crystallographic data, magnetic and vibrational properties of the series $Ln(OH)CrO_4$ (Ln ≡ La, Pr, Nd), 105

Water vapour
hydrolysis of lanthanide dicarbides: rates of reaction with water vapour, 349
Weight ratio
effect of ball-to-powder weight ratio on the amorphization reaction of $Al_{50}Ta_{50}$ by ball milling, 235

X-ray diffraction
Chemical reaction high-temperature X-ray diffraction: application to carbothermic nituration of zirconia, 317

Ytterbium
new ternary calcium- and ytterbium–silver aluminides with silver–aluminium Kagomé nets in different stackings, 55
Yttrium
enthalpies of formation of some Ga–Y intermetallic compounds, L23
nuclear magnetic resonance study and Curie temperature of $Y_2Co_{17}C_x$, L5
X-ray diffraction study of the orthorhombic–tetragonal transition in $Y_{1-x}Ca_xBaCu_3O_z$ superconductors as a function of the oxygen partial pressure at 500 and 600 °C, 115

Zinc
calculation of horizontal sections of high-pressure phase diagrams of the Cd–Sn–Zn ternary system, 303
crystal structure of Eu_2BaZnO_5 and the optical and magnetic properties of some related oxides, 217
Zirconia
chemical reaction high-temperature X-ray diffraction: application to carbothermic nitruration of zirconia, 317
Zirconium
deoxidation equilibrium of solid titanium, zirconium and niobium with calcium, 209
